Left & Right 90 Degree Turns With Shifting

- Start between the first set of cones, either on the left or right
- You must practice both directions
- Complete a strong move off and accelerate at the first cone
- Shift up to second gear then return hands back to the grips
- Immediately shift down to first gear
- Return hands back to the grips (*Rev Rev!*)
- Look. Push. Countersteer and counter balance to place your front tire on the white lines
- Use constant throttle and rear brake while turning
- Clutch must at friction point while turning ("Set then Drag" ☆)
- Going down hill, don't accelerate, but shift up to second quickly
- Hands back to the grips
- Shift back to first and return your hands back to the grips
- Stop at the double cones.
- When clear, repeat in the opposite direction
